

Spatial Understaing: "Describe the image"

LLaVA: The image shows a **rover on a Martian** ✓ surface, with a large satellite or spacecraft in the background. The rover is driving across the Martian terrain, and the satellite **is positioned above it.** ✗

World-LM: The image shows rocket on the ground, surrounded by sand, with small rocket and a large **rocket in the distance.** ✓

Temperal Understanding: What will happen?

LLaVA(Answer by Reasoning): In the image, there are two large rovers on a dirt field, with one of them being a robotic rover. The rovers are likely to be used for exploring the Martian surface, collecting data, and possibly even conducting scientific experiments. The presence of these rovers on the Martian surface indicates that the mission is in progress, and the **rovers will continue to operate until they complete their tasks or run out of fuel.** The rovers' presence on the Martian surface is a significant milestone in the exploration of the red planet and the advancement of space exploration technology.

World-LM(Answer by Envisioning):

1. The rover will drive away
2. The rover will stop and wait for instructions
3. The rover will drive towards the other rover
